

Bimetal thermometer

Process version per EN 13190

Model TG54

WIKA data sheet TM 54.02

For further approvals
see page 9

Applications

- General process instrumentation in the chemical and petrochemical industries, oil and gas industries, power generation and water/wastewater industries
- Temperature measurement in harsh and aggressive environments
- Suitable for applications with high vibrations

Special features

- Nominal sizes 63, 80, 100, 160 mm [2.5, 3, 4, 6"]
- Robust, hermetically sealed case
- External reset for setting the reference temperature
- Dished dial (anti-parallax) for ease of reading
- Adjustable stem and dial version enables optimal process connection

Fig. left: Back mount (axial)

Fig. right: Back mount, adjustable stem and dial

Description

The model TG54 bimetal thermometer has been developed and is manufactured in accordance with the EN 13190 standard. The thermometer meets the high requirements of the process industries.

Especially in the chemical and petrochemical, oil and gas, power engineering and shipbuilding industries, the temperature measuring instrument manufactured from stainless steel is used successfully. The robust, hermetically sealed case with IP65 ingress protection enables use with harsh external conditions and high vibration.

With a count of four different nominal sizes, an optimal matching to the available space and mounting conditions is possible.

At an easily accessible point on the back of the case, the zero point can be easily corrected.

The model TG54 meets the high requirements for resistance against aggressive media. As an option, the case, the stem and the process connection can be made from 316L.

Specifications

Detailed views

1) Only within the measuring range will the printed accuracy class (class 1 or 2) be guaranteed.

Thermowell/protection tube	<p>In principle, the operation of a mechanical thermometer is possible without a thermowell/protection tube with low process-side loading (low pressure, low viscosity and low flow velocities).</p> <p>However, in order to enable exchanging the thermometer during operation (e.g. instrument replacement or calibration) and to ensure a better protection of the instrument and also the plant and the environment, it is advisable to use a thermowell/protection tube from the extensive WIKA portfolio.</p> <p>→ For further information on the wake frequency calculation, see Technical information IN 00.15.</p>

Nominal size	Process connection	Dimensions in mm ["]				
		NS in mm ["]	G	i	SW	d_4
63, 80, 100, 160 [2,5, 3, 4, 6]	G ½ B		14 [0.55]	27 [1.06]	26 [1.02]	■ 6 ■ 8 [0.32]
	½ NPT		19 [0.75]	22 [0.87]	-	■ 6 ■ 8 [0.32]

Legend:

- G Male thread
- G₁ Female thread
- i Thread length (incl. collar)
- a Distance to the case/articulated joint
- Ø d₄ Diameter of the sealing collar
- SW Spanner width
- Ø d Stem diameter
- l₂ Active length

Design 4.1, compression fitting with support tube sliding on stem

Standard insertion length $l_1 = 63, 100, 160, 200, 250$ mm
 [2.48, 3.94, 6.3, 7.87, 9.84 in]
 Length $L = l_1 + 40$ mm [1.58 in]
